Washington University in St. Louis

To Whom It May Concern:

The Center for the Integration of Research Teaching and Learning (CIRTL) (www.cirtl.net) offers online courses for graduate students and post-docs from CIRTL Network universities across the nations who are interested in teaching and learning. CIRTL courses use the diversity of the CIRTL Network to prepare future science, engineering and math faculty members who are both superb researchers and excellent teachers.

Rohit Rawat has completed the equivalent of a one-credit graduate level CIRTL Network course, Research Mentor Training, on April 9, 2014.

CIRTL Network courses help prepare future faculty for careers that integrate research, teaching, and learning. Courses are based on three core ideas, teaching-as research, the systematic, and reflective use of research methods to develop successful teaching practices; learning communities, which bring together groups of people for shared learning and generation of knowledge; and learning-through-diversity, the utilization of the rich array of experiences, backgrounds, and skills to enhance the learning of all.

Sincerely,

Robin M. Greenler

Center for the Integration of Research, Teaching and Learning (CIRTL)
